

Unit 8: Summer Task

The origins of public health policy

Produce a report to explain the origins of public health policy.

You should use your class notes and your information from your study tasks for the Beveridge Report and the National Health Act.

You need to:

Explain what public health policy is.

Explain why it was needed.

Explain the Beveridge Report.

Explain the 5 main concerns for society within the report – stating what they were, why they were a concern and how they impacted on society and health and wellbeing.

Explain the policies that were introduced to society to address the 5 main concerns – explain what the policies were, why they were introduced, how they were expected to help society and health and wellbeing.

Fully explain the Nation Health Services Act – explain where this came from, how it has changed and developed overtime and how it is still important in today's society – explain the concerns for the Government now for the NHS.

Please see Mrs Ward during your taster week if you need any help.

Public health policy is...

This is needed because...

The Beveridge Report is...

It was produced in.... by...

They felt it was needed because....

It states that..... This is because....

The 5 main concerns to come from this report are....

Firstly,..... was a concern because... this impacted on society because.... The effect it was having on health and wellbeing was.... The..... policy was introduced, this is..... This was needed because..... this was seen to help society because.....
